

## Legal Advice session with: Leigh, Day & Co Solicitors

Leigh, Day & Co is one of the leading law firms in the country. During the last year, it's complex Personal Injury team has continued to move forward with its reputation for achieving excellent results on behalf of its clients in specialised areas of head and spinal injuries, amputations, burns, road accidents, cycling injuries, accidents at work, holiday claims and occupational disease.

Their Human Rights Department is committed to providing legal support to those who have had their basic human rights violated. They act for many vulnerable members of society who have had their rights to education, social care and healthcare denied.

If you would like to make an appointment for the Advice Session every Wednesday afternoon at the Law Centre **Please contact Lewisham Law Centre**

Advice at the sessions will be available in relation to any types of accidents, injury or human rights claim on your legal rights and whether a claim for compensation can be made.

We will discuss with you the arrangements to progress you claim and the financial arrangements to fund your claim.

These days most cases can be taken on under the 'No Win No Fee' Scheme, however Legal Aid is still available for some cases and often household and motor car insurance policies also provide for covering the costs of an accident claim.
